

Cyrus Manatad

Experienced web developer with 8 years of experience in the IT industry. Excellent reputation for resolving technical problems, improving client satisfaction, maintaining standards, and following best practices and principles in software engineering.

EXPERIENCE

FYB Technologies Inc., BGC Taguig **Sr. Full-Stack Developer**

Jan 2026 - Present

- Designed and developed integration APIs for casino platforms and third-party game providers using NestJS (Node.js) within a microservices architecture, enabling scalable and modular service deployment.
- Implemented secure wallet and transaction integrations between casino systems and multiple game providers, ensuring reliable real-time communication.
- Built and maintained RESTful APIs for game session management, betting transactions, and player wallet operations.
- Experienced using AWS services, such as DynamoDB, S3, and Elasticsearch for scalable data storage, log indexing, and high-performance search capabilities.
- Implemented caching using Redis to improve API response time and reduce database load for frequently accessed data.
- Developed a microservice for game launch, transaction processing, and provider communication, improving system reliability and maintainability.
- Maintained and enhanced existing applications built with PHP Laravel, Vue.js, and MySQL, ensuring stability and performance improvements.
- Collaborated with cross-functional teams, game providers, and aggregators to troubleshoot integration issues, optimize API performance, and ensure smooth deployment across staging and production environments.
- Experienced creating game mechanics for slot games.

Vertere Global Solutions Inc., Makati City, NCR **Programmer/Analyst II**

August 2019 - December 2025

- Led the development and implementation of multiple web-based software applications across various clients, aligning technical solutions with business goals and user needs.
- Developed scalable, responsive web applications using HTML, CSS, JavaScript, and PHP, with extensive use of jQuery and CodeIgniter

254 Molave Street
Brgy. Hagonoy, Taguig City

Supplier Audit Management System

frameworks to create intuitive and high-performing user interfaces.

- Experienced in building custom CMS with Single Sign-On (SSO) authentication between multiple systems such as Microsoft Azure Entra ID and LDAP integration.
- Built RESTful and SOAP-based web services, enabling seamless data exchange between distributed systems (Oracle) and external APIs.
- Wrote and optimized complex SQL queries for various database systems, including MySQL, MariaDB, and MSSQL (MDX Query).
- Managed source code and collaborated with teams using Git for version control, code reviews, and CI/CD workflows.
- Great experience in development using Docker as well as Continuous Integration/Continuous Deployment, or CI/CD, process to limit or minimize issues encountered in different environment setups.
- Collaborated on all stages of systems development lifecycle, from requirements gathering to production releases.
- Manage web servers and set up repositories for local and remote servers such as AWS/Plesk and On-Premises that goes either thru GitLab, GitHub, or from the server itself (local).
- Met with project manager and team members to provide detailed project reports and milestone updates.
- Worked closely with clients to establish problem specifications and system designs.
- Collaborate with UI/UX designers, backend developers, and other stakeholders to discuss and integrate features effectively.
- Conduct detailed assessments for new projects and enhancements.
- Knowledgeable in other different frameworks and libraries such as Laravel, ReactJS, Bootstrap, Tailwindcss and Shadcn UI.
- Optimize web application performance and diagnose issues using tools like PageSpeed Insights, GTMetrix and Pingdom.
- Collaborate with other senior developers to standardize processes and easy to understand coding standards.

LANGUAGES/DIALECT

English, Tagalog, Bisaya, Waray

Diversified Technology Solutions Inc, Makati City, NCR **PHP Programmer**

March 2018 - August 2019

- Developed an end-to-end recruitment process automation system.
- Designed and created a user-friendly, homegrown job application portal for applicants, improving the candidate experience.
- Integrated email notifications and alerts to keep both candidates and the recruitment team informed throughout the process.
- Reduced manual data entry and paperwork, leading to increased efficiency and time saving for the recruitment team.
- Designed and built an automated system for managing the New Employee Integration Program (NEIP).
- Developed a contract automation system to generate employment contracts and agreements in PDF format. This to reduce the time

required to create and finalize employment contracts and improve the HR team's efficiency.

- Created an automated exit clearance system for departing employees.
- As a solo developer with the company, I collaborated closely with the Recruitment Manager to understand requirements, recruitment process and task priorities.
- Provided regular updates on project progress.
- Actively participated in recruitment meetings and discussions to improve recruitment processes and application systems.

System Developer Intern, Abuyog, Leyte

Jan 2017 - July 2017

- Conceptualized and developed a comprehensive healthcare process automation system for Rural Health Unit (RHU).
- Designed and implemented the system to minimize paperwork and streamline daily routines and operations, aiming for a paperless work environment.
- Automated key processes such as patient registration and medical record management. • Created a user-friendly interface for healthcare staff to interact with the system.
- Ensured data security and privacy compliance to protect sensitive patient information.

EDUCATION

Visayas State University, VisCA Baybay, Leyte *BS Computer Science*

2012 - 2017
